2. Details of Auxillary reduction of power consumption

Major Challenges

1. Searching for resources to study
2. It was quite challenging for me to prepare a final report for industry and PS1
3. Searching for appropriate resources to study for the report–

Work Plan for Next Week

Since PS1 is now concluded I plan to work on the soft. As well as technical skills I gained throughout my PS and build upon those concepts and also to use the experiences I had in my PS to their fullest advantages. Hence I thank my mentor from Vikram Cement Works for the help and support he has provided us during the course of time. I would also like to thank my PS1 instructor who has been very kind and generous as he was available to help us at every time of need.
